

STRATEGIC DIRECTIONS 2017–2026

PHRN Population
Health
Research
Network

PHRN supports world-class research through privacy-preserving linkage of administrative data.

PHRN invests in infrastructure that boosts Australia's capacity to link population data. Our network includes leading universities, research institutes and government agencies. Research done using the linked data generates new knowledge and supports improvements in the delivery of a wide range of human services.

VISION Linking life data to improve the wellbeing of all Australians

VALUES COLLABORATION INNOVATION ETHICAL CONDUCT COMMUNITY INVOLVEMENT TRUSTWORTHINESS

MISSION To lead and enable the linking of data for world class, action-oriented research

GOALS	1. INNOVATIVE INFRASTRUCTURE	2. WORLD CLASS RESEARCH AND ANALYSIS	3. ADVOCACY AND COMMUNICATIONS	4. SUCCESSFUL COLLABORATIONS
	Lead and invest in national collaborative, innovative data linkage infrastructure	Facilitate and grow the use of linked data for world class, action-oriented research	Advocate for better access to and use of linked data, and communicate research findings	Foster collaborations between researchers, governments and industry partners
Objectives	 <p>1.1 Continue to enhance, maintain and develop data linkage infrastructure</p> <p>1.2 Pursue innovative solutions to improve the efficiency of the application, data linkage, extraction and access processes</p>	 <p>2.1 Build and support the development of capacity to analyse and interpret linked population data</p> <p>2.2 Work with researchers and others to identify national priorities for research using linked data</p>	 <p>3.1 Determine the "advocacy" role and focus</p> <p>3.2 Expand community and consumer engagement in the network</p> <p>3.3 Undertake a campaign to position the organisation, communicating its new vision, mission, roles and structure</p> <p>3.4 Build a marketing/communication profile and campaign around the value of and need for linked data</p>	 <p>4.1 Develop new collaborations and partnerships for development and use of linked data</p> <p>4.2 Develop actions in consultation with relevant agencies to facilitate linkages between Commonwealth and other data</p> <p>4.3 Develop actions to establish collaborations with private sector partners and create strategic alliances</p>
